The Congress is the scientific meeting of the International Society of Behavioral Medicine, a vibrant scientific society representing individuals from all over the world who are brought together by a common interest in the development and integration of sociocultural, psychosocial, behavioral and biomedical knowledge relevant to health and illness and the application of this knowledge to disease prevention, health promotion, etiology, diagnosis, treatment and rehabilitation.

Our Congress, held every two years, brings together over 700 scientists and trainees in the field of Behavioral Medicine from diverse international and scientific backgrounds.

The theme of the 12th Congress, Behavioral Medicine: From Basic Science to Clinical Investigation and Public Health, will be reflected throughout the meeting through a variety of symposia, paper and poster presentations.
